SUMMARY

Computer Science undergraduate graduating in 2027 with experience building user-facing web applications, backend systems, and AI-powered workflows. Strong programming foundation in Java, Python, C++, OOP, and data structures and algorithms. Projects combine REST APIs, database integration, real-time features, and AWS deployment to address practical user needs.

SKILLS

Programming & Fundamentals: Java, Python, C++, C, JavaScript; OOP, Data Structures & Algorithms
Backend & Databases: Flask, Node.js, REST APIs, SQLite, MySQL, MongoDB
Web Technologies: React.js, HTML5, CSS3, Tailwind CSS, WebSockets, Chart.js
Tools & Deployment: Git, GitHub, GitHub Actions CI/CD, Linux, AWS EC2, Docker, Nginx, Gunicorn
Professional Skills: Analytical Problem-Solving, Collaboration, Adaptability, Consistency

PROJECTS

Ni-Assist | GitHub — Nov 2024 - Jan 2025

- Architected a Flask-based AI assistant that transforms conversations and uploaded documents into evidence-based answers and actionable task plans.
- Orchestrated authentication, contextual chat memory, response streaming, voice interaction, and automated reminders using Gemini API and SQLite.
- Established HTTPS hosting on AWS EC2 with Nginx and Gunicorn, supporting application deployment and server maintenance.

Technologies: Python, Flask, Gemini API, SQLite, AWS EC2, Nginx, Gunicorn, JavaScript

Monitoring Dashboard | GitHub — Mar 2026 - Apr 2026

- Engineered a React and Node.js dashboard to monitor CPU, memory, and disk utilization, providing real-time visibility into system resource usage.
- Implemented WebSocket-based updates, interactive charts, and alerts to support diagnosis of performance bottlenecks.
- Containerized the application with Docker to streamline deployment and maintain environment consistency.

Technologies: React, Node.js, WebSockets, Chart.js, Docker

Eco-Track | GitHub — Feb 2025 - Mar 2025

- Developed a food-waste analytics platform that presents food-waste insights through visual dashboards to support informed food-management decisions.
- Integrated Gemini API-powered conversational assistance to provide personalized food-storage recommendations.
- Crafted a responsive interface with interactive visualizations, animations, and gamified features to encourage user engagement.

Technologies: HTML, Tailwind CSS, JavaScript, Chart.js, Gemini API

TRAINING

C++ Programming: DSA & OOP | CSE Pathshala — Jun 2025 - Aug 2025

- Completed practical training in data structures, algorithms, and object-oriented programming.
- Designed an Event Ticket Booking System with role-based access control and CSV-based data persistence.

CERTIFICATES

- Oracle Cloud Infrastructure AI Foundations Associate — May 2026
- AI Fluency: Fundamentals & Frameworks | Anthropic Academy — Oct 2025
- Generative AI | Infosys — Aug 2025
- Cloud Computing | NPTEL — Apr 2025
- Computer Networks | Coursera — Sep 2024

ACHIEVEMENTS

- Solved **200+ DSA problems** on LeetCode — Dec 2025
- Earned a **5-Star (Gold) Java rating** on HackerRank — Oct 2025

EDUCATION

Lovely Professional University | Phagwara, Punjab — Aug 2023 - Present
B.Tech, Computer Science & Engineering | CGPA: 7.49 | Expected graduation: 2027

CM Rise Govt. Padma Raje Girls Higher Secondary — Apr 2022 - Mar 2023
Intermediate | CGPA: 8.42 | Gwalior, Madhya Pradesh

Oracle Public School | Gwalior, Madhya Pradesh — Apr 2020 - Mar 2021
Matriculation | CGPA: 6.63
